Feb. 15, 1992 Saturday

Scott Woodward + I went to Fayum C.H., and met with Ali Bezzdeq, Director of Fayum Antiquities, Then with Gamal El Rabat Chief of Police of Antiquities Tourism, Fayum. After we got our passports copied, we all drove to the site, walked over the graveyard + up to the pyramid, then back to Fayum.

Feb. 16, Sunday. Went to Fayum + picked up our Inspector. Said Ali Kolieb, then came to the site and Scott + I cleared out the storage magazine. Mitred + Marek Kotszewski arrived about 2 pm. from Cairo. We walked to the site + selected the area for our first 1992 excavation.

Disarticulated

Skull #5 was a youth, aged 8-10, with 1<sup>st</sup> molar erupted. Hair color is brown, with some reddish tint. Teeth in excellent condition, with all ridges obvious - no wear pattern - front teeth one missing - post mortem - (top) mandible - all teeth present and in good condition. 2<sup>nd</sup> molar nearly ready to erupt.

Skull #6 - adult female (?) some parietal boxing. - pointed jaw. dental wear pattern #2. periodontal disease - upper pre-molar + 1<sup>st</sup> molar missing (post-mortem - large caries on right lower 2<sup>nd</sup> molar - outside) worn to dentin in

lower front teeth -

left side - premolars & 1<sup>st</sup> & 2<sup>nd</sup>  
molars missing ante-mortem -  
tooth wear greater where occlusion  
occurred.

Hair = brown w/ a few white hairs  
evident. Both eyes & facial tissue  
present.

extra mandible of an adult - with all  
molars erupted. 1<sup>st</sup> molar has cavity  
on chewing surface.

Wilfred went to Karanis to check on some Greek papyri he has been given permission to translate & publish.

Alf, Scott, Marciel & I gassed the car & came to work. We have 15 workers today. We are running 2 feet & one down about 28 cm in the center of the squares. We have an undisturbed mummy, not many rocks or in the feels. We have one stone shaped like a grave marker.

We have exposed 4 mummies that lie with the head in the SW area and the feet in the SE area. So we will open the SE area. We will color code the SW area as Pink (Pine Marking Tape or red plastic squares) & the SE as Green, Green Tape on Green plastic on white Tape on Green plastic if I cannot find the green tape. We will designate a body as in the square where the head of the body is found.

Market is stuck today + remained at  
Shankhouse. High winds last night + a slight  
rain this morning. Scott, Dee, & Kudz  
arrived at the site at 8:05. Wilkins, Koda  
& Revell went to Feyum to pick up an  
inspector to work at the pyramid + the  
stele. It is cool + a slight breeze but  
the site is as we left it last night.  
We have 30 workers. We had 37 men  
show but could not keep them all.  
We will clear the area to mark & define  
the 2 areas before we push for more bodies.  
We have too much of a hole + the sides  
are caving in. We want to work our  
way down, not in a hole + across.

DESCRIPTION: We did NOT excavate this area to sterile soil, we ran out of time. There was some indication that the topography of this area would lead to harder soil at a depth of 1½ meter, much like the hard soil and the shaft tombs of the SE & SW areas.
